

Date: June 12, 2014

In an effort to meet the changing needs of our customers, Independent Explosives, along with Dyno Nobel, is pleased to offer the Construction Pack for the Nonel EZTL 1.4B Detpak product line.

The Nonel EZTL 1.4B Detpak Construction Pack has 3 inner cartons inside of a Detpak sub-pack. Each inner carton contains 1/3 of the sub-pack's overall quantity. The small inner cartons are marked as "Detonator 1.4B" for legal transport in an IME 22 container only.

The small cartons labeled "1.4B Detonators, for use in an IME standard 22 container only" can be shipped in the IME container with the following conditions:

- 1) The detonators must have been classed 1.4B in their original boxes and contain no more than 1 gram of explosive;
- 2) Carton should never exceed the quantity printed on the original label;
- 3) No more than 1000 units in the IME 22 container;
- 4) The inner cartons or boxes must be marked "1.4B Detonators".

You can put multiple inner packaging (construction packs) in the IME 22 container up to 1000 units.

The construction packs can be transported in the IME 22 container and do not require their manufacturer's original outer packaging (see CFR-49 173.63(g)).
